

As an over the road truck driver, I depend heavily on the instant traffic and weather reports the XM Satellite radio provides. It assists me in being able to reroute myself to avoid major traffic delays and make my deliveries on time. XM Satellite radio also provides me the means to listen to quality music and broadcasting without having to keep reaching over to the radio to tune in stations, as these stations do not fade out where I have to select (or tune) another one in on the dial. Thus, making my job safer, in the sense that I can devote my time paying attention to the road and other drivers around me versus trying to tune in radio stations.
